

As a subscriber and listener to XM radio I feel restricting to rights to publish public information such as traffic and weather is down right despicable. I live in a small southern town where up to the minute traffic reports are unnecessary and yet I am still outraged at the petition to restrict first amendment rights, especially regulating a fee-for-service industry like satellite radio.

Policy makers, please keep America free and oppose HR 4026. And send a message to the NAB that there is still plenty of "market" and money to be made for everyone. But it won't be done and shouldn't be done by bullying an innovative company like XM radio.
